## JEWELLERY

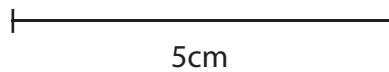

We have put together this simple ring sizing guide to help you to order the correct size ring. Please be advised this is a guide only and will not be as accurate as visiting a local jewellers to have your finger sized in person.

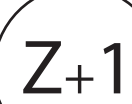

The discs below represent the inside diameter of the UK and Australian sizes E to Z, for our international customers the equivalent American, European and Japanese sizes are also given.

Print this sheet out, and hold an existing ring over the discs. The correct size will be the disc that matches the inside diameter of your ring. If your ring is in between sizes don't worry we make rings in half sizes as well.

For the greatest accuracy use one of your own rings with a similar width of band to the one you wish to purchase.

To make sure the sheet has printed with the correct dimensions measure the guide line it should measure 5cm exactly.
